

WE ARE HIRING: Skilled Construction Laborer

RenoLINC™ is a growing, family run, residential and commercial construction business based in Foothills County/South Calgary.

We specialize in all aspects of construction from top to bottom, inside and out. Our mission is to provide an excellent customer experience and build client relationships for life.

Our goal is to enhance trust and integrity in the industry one project at a time. We are committed to safety, quality, honesty and getting the project completed. With a large ongoing project west of Calgary, continuous projects in south Calgary and Foothills County we are currently looking to grow our leadership team and invite experienced leaders to join us driving Alberta's construction projects forward.

Job Overview:

We are seeking dedicated and Skilled Construction Laborers for our residential and construction projects most specifically for our ongoing project west of Calgary and South Calgary. The ideal candidates will possess a strong work ethic and a diverse skill set in construction and maintenance tasks. This role is essential for supporting various projects at a time, ensuring quality workmanship and contributing to the overall success of our operations. This is a seasonal position with the potential to earn a continuous position.

Responsibilities:

- Perform/Assist with all exterior construction tasks as noted below:
- Pick-off/drop-off materials for projects
- Concrete forming and pouring
- Install and secure rebar, set forms for footings and work with ICF wall systems
- Framing, installation, and finishing work.
- Roofing, including solar panel installation
- Operate construction tools and equipment (ie. jackhammers, concrete mixers, power tools) safely and efficiently
- Carpentry tasks and structural work
- Lay tiles with precision for flooring and wall applications.
- Restore surfaces and structures as needed to maintain quality standards.
- Read and interpret blueprints to execute project specifications accurately.
- Plumb fixtures and structures to ensure proper alignment and functionality.
- Execute concrete forming tasks for foundations, slabs, and other structures.
- Install various types of flooring, ensuring durability and aesthetic appeal.
- Apply caulking to seal joints and gaps for weatherproofing and insulation.
- Adhere to all Safety Protocols
- Participate with daily Safety Meetings

Essential Qualifications:

- 3-5 minimum Construction Experience
- Proficiency in carpentry
- Familiarity with construction tools and equipment
- Experience as a carpenter with knowledge of framing and finishing
- Ability to perform construction estimating effectively.
- Knowledgeable in restoration techniques for various materials.
- Strong capability in blueprint reading for accurate project execution.
- Familiarity with basic plumbing principles related to construction tasks.
- Familiarity with basic electrical principles related to construction tasks.
- Experience in concrete forming processes.
- Competence in flooring installation across different materials.
- Proficient in caulking applications for sealing purposes.
- Solar Panel Installation (not required, but ideal)
- Valid Driver's License and Reliable Vehicle

Training:

- Alberta Construction Safety Association (ACSA)
- Construction Safety Training System (CSTS-09 or CSTS 2020 Fundamentals)
- Fall Protection Training
- First Aid/CPR

Please note, if candidate lacks any of the above certificates, they can be taken online. RenoLINC™ will also provide training to obtain.

Additional Information:

Wage: Starting wage is based on experience and is paid every other Friday.

Seasonal Role: With opportunity for continuous position.

Opportunity: Overtime pay during peak project season and position advancement.

Education: Ongoing training provided.

Projects: Based mainly in South Calgary and Foothills typically, but currently our large project is west of Calgary (35 minutes).

Work Environment:

- We are a small, family built, team focused Crew-collaboration, reliability and hard-work are valued
- You will be in a supportive environment with open communication
- You will participate in regular safety and team meetings
- Your willingness to contribute and be a Team player will be essential to your success
- Your expertise will be valued and your contributions will make a significant impact on our projects

How To Apply & Screening Process:

- Submit your resume and cover letter to admin@renolinc.com (subject line: Working Construction Site Supervisor Application-Name)
